After Seven Years Search

Peonies--Special Offer

AT a Board meeting held over seven years ago Mr. Elliott told his directors that he was satisfied that our clients would appreciate an opportunity to buy fine Peonies at a reduced price more than anything else we might do for them. The board of directors gave Mr. Elliott the necessary authority to make an offer of Peonies if and when the plants were available, and we have been trying to get fine Peonies in sufficient quantities for this purpose ever since.

However, as you all know, Peonies are the most popular of all herbaceous perennials and the supply has never been equal to the demand. For years, we have not only grown all we could but, in addition, we have bought all the first class plants we could find. Still we have never had enough to supply all of our customers even at the regular prices.

At last, after seven years search, we have secured, at a price, a collection of fine Peonies. The grade is standard three to five eye divisions and the quality of the plants is as fine as any we have ever seen. Unfortunately, the number of plants available is not as large by half as it should be if all of our customers are to get all of the plants they want. However, if we wait until we can find all of the plants we shall need for an offer of this kind, we may never be able to give you this opportunity.

Orders for these Peonies will be accepted and numbered strictly in rotation as received as long as the plants last. No special favors can or will be given to late comers. The plants will be dug and shipped in September as early as the weather permits.

In planting Peonies select a position which is either in the full sun or very slightly shaded. For the best results loosen the soil to a depth of eighteen inches and add thereto well rotted manure, one part manure to four or five of soil. If artificial fertilizer is used apply as directed by the manufacturer of the brand secured. Mulch over the first winter with an inch or so of leaves, Holland Peat, Straw Manure or similar litter, put in place after the ground freezes for the first time. After the first winter the plants will take care of themselves.

We will Pay Transportation Charges on All Special offer Peonies if Cash accompanies the Order. Canadian customers please add 5c a plant to the following prices. Regular catalogue prices are F. O. B. Pittsburgh.

Peonies in Mixture

In addition to the Peonies listed above there are in this collection a number of varieties the quantities of which, 25 to 150 of a kind, are too small to list by name. These odds and ends, all fine varieties, will be dug and mixed together and sold as a mixture. The offer is good only as long as the plants last.

Special Mixture of Peonies—\$35.00 per hundred.....	.45	4.00

Regal Lilies -- Bargain Offer

Lilium Regale

You will recall that last season we were fortunate enough to purchase a field of Regal Lilies at a price of about fifty cents on the dollar. We passed this bargain along to our customers who took advantage of it so quickly that we sold out completely and had orders for thousands of bulbs which we could not fill

As was to be expected, when we came to harvest the bulbs in this field, there were a few thousands which were too small to send out. We knew, however, that, given another year's cultivation, they would be first class bulbs and consequently we had them planted and grown on. Since we have had to spend additional time and labor on them, we obviously cannot offer them as cheaply as we did last year. Even so, with the additional labor and other charges added to the price, they can still be sold for twenty-five per cent under the regular price. As long as they last, they will be furnished for

\$3.75 per dozen, \$30.24 per hundred

delivered if cash accompanies the order. Canadian customers please add 5c per dozen, 35c per hundred.

Delivery of Regal Lilies will be made as early in October as weather permits. Orders will be accepted and numbered strictly in rotation as received.

Special Mixture of Tall Bearded Iris

At our old Springdale Nurseries we had a considerable collection of Tall Bearded Iris for testing. Though the number of varieties was large there were not more than 25 to 50 plants of any one variety. In moving the identifying labels of these plants were lost and it is more economical for us to buy new collections for our further tests than to try and straighten out the confusion which now exists in these old Springdale collections. We have, therefore, thrown these plants into a mixture: probably the finest mixture of Bearded Iris that ever was or ever will be made. As long as the plants last we will furnish them at

\$1.10 per dozen, \$8.60 per hundred

delivered if cash accompanies the order. Canadian customers please add 10c per dozen, 70¢ per hundred to the above prices.
